

# DILLON

Dillon is a heavy-duty, antimicrobial, polyurethane fabric designed to withstand the high wear and tear of a theatre environment. Available in an array of colours, you'll be sure to find the perfect complement to your décor.

## Key Selling Features:

- High durability designed for years of use, made possible with the latest technology
- Leather-like texture, with a full hand and a nice drag to the touch
- High surface abrasion with a heavy duty rating of 200,000 double rubs
- The antimicrobial silver-based technology allows for long-lasting commercial use

## Available in Twenty-Two Beautiful Colours:

## Easy to Clean Instructions:

Clean all stained areas as soon as possible in accordance with the recommended stain removal procedures. Spot clean with upholstery shampoo, foam from a mild detergent, or mild dry cleaning solvent. Clean spots or stains from the outside to the middle of the affected area to prevent circling.

Hot water extraction or steam cleaning is not a recommended cleaning method.

A clean cloth, dampened with the appropriate cleaning solution, should be applied to the affected areas as soon as possible. Blot the fabric with the treated cloth, working from the outer edge of the stained area and moving in toward the centre. In order to effectively draw out the stain, renew the cleaning cloth as often as necessary to maintain an absorbent surface.

## Recommended Cleaning Solutions:

1. Soap and water
2. For difficult stains use Fantastik® or Formula 409®
3. Disinfect with 5 : 1 (5 parts water to one part bleach) solution

## DILLON SPECIFICATIONS:

<b>Content:</b>	100% Polyurethane
<b>Backing:</b>	70% Polyester, 30% Cotton
<b>Finish:</b>	Antimicrobial—Silver Based Ion Technology

## Cleaning Instructions for Dillon Culp

1. Affected areas should be cleaned as soon as possible. We recommend using water base cleaners; soap and water for basic cleaning, or Fantastik or Formula 409 for more difficult stains.
2. A clean cloth, dampened with the appropriate cleaning solution, should be applied to the affected areas as soon as possible. Blot the fabric with the treated cloth, working from the outer edge of the stained area and moving in toward the center. In order to effectively draw out the stain, renew the cleaning cloth as often as necessary to maintain an absorbent surface.
3. Rinse cloth with fresh water and wipe affected area to remove any residue from the soap and water. Wipe dry with a clean cloth.
4. Challenging stains such as hair oil, soft drink, chocolate, popcorn oil, candy, etc. — wipe affected area with a cloth using Woolite upholstery cleaner. Rinse cloth with fresh water and wipe affected area to remove any residue. Wipe dry with a clean cloth.
5. Instructions to remove chewing gum:
  - a. Use a citrus solvent cleaner and spray onto the chewing gum. Many of these are listed as chewing gum removers. These cleaners can be purchased from janitorial supply companies.
  - b. Take a plastic scraper with a rounded end and work around the edge of the chewing gum. The sprayed cleaner should help lift off the chewing gum from the fabric.
  - c. Take a damp, wet cloth and wipe the spot off. This removes any excess solvent cleaner that could still be on the fabric.
6. For more persistent stains, you can treat and disinfect with a 5 : 1 water/bleach solution.
7. Do not attempt steam cleaning.
